Also includes two interactive workshops

ABOUT THE TRAINING

Forensic Peer Support is a subspecialty of peer support services. This training will provide you with valuable tools and vital information that will enable you to effectively support your justice involved clients. You will also learn to utilize the Sequential Intercept Model (SIM) to enhance positive engagement across the entire criminal justice continuum.

This training represents best practices derived from a review of the existing literature, supporting research and the experience of our Forensic Peer Mentors. Forty-two (42) hours/CEUs of self-paced, online training modules are combined with two (2) interactive workshops led by a subject matter expert that reinforce the competencies with specific KSA's (Knowledge, Skills and Attitudes).
